

Module specification

1. Factual information			
Module title	NC5208: A Focus on Trauma		
Module tutor	Alex Morfaki	Level	5
Module type	Taught	Credit value	10
Mode of delivery	100% face-to-face		
Notional learning hours	100 notional hours, made up of: Lectures: 10 hours Independent study: 90 hours		
2. Rationale for the module and its links with other modules			
Trauma can be experienced by any child, and thus it is important that a nanny is equipped with the skills to respond and support children and families. Building on learning from NC4203: Keeping Children Safe: Safeguarding and Child Protection, NC4205: Principles of Equality, Diversity, and Inclusion and NC5205: Promoting Health in Practice, this module will provide an opportunity to look more closely at what constitutes trauma and the impact that this will have on families.			
3. Aims of the module			
The purpose of this module is to explore the impact of adverse childhood experiences in detail, applying theory and understanding of trauma and its impacts. Students will also consider how they might -within a nanny role - support children who may have experienced trauma.			
4. Pre-requisite modules or specified entry requirements			
None.			
5. Is the module compensatable?			
Yes – at module level.			
6. Learning, teaching and assessment strategy for the module			
Lectures Independent research activity Group tasks			

7. Intended learning outcomes *At the end of the module, learners will be expected to:*

1. Critically explore childhood trauma and its impact.

2. Apply concepts to demonstrate how children who have experienced trauma can be supported effectively

This module provides opportunities for you to evidence the Early Childhood Graduate Practitioner Competencies <https://www.ecsdn.org/wp-content/uploads/2021/09/ECSDN-Booklet-Rev-July-2020.pdf>.

A: Knowledge and understanding	B: Cognitive skills	C: Practical and professional skills	D: Key transferable skills
A1; A2; A3	B1	C1	D2

8. Indicative content *This should provide an overview of content over the number of weeks of module delivery*

Adversity, childhood experiences and trauma: physiological, neurological and psychological implications

Fostering security, attachments and resilience through practice: supporting children and families

9. Assessment

Assessment rationale

Students will contribute to a discussion about a case study of a child who has experienced trauma and how the child within the case study can be supported. By applying theoretical understanding, students will collaborate in discussion to build knowledge that can be taken into future practice.

Students will be provided with a scenario-based case study and will discuss the unique challenges and consideration for practice, applying knowledge from the taught content and independent reading evidenced by the submission of a bibliography. The submission will include an annotated self-assessment rubric that is completed by the student following the discussion.

9. Assessment				
Assessment task/s	Weighting	Trimester submitted	Grading (Pass/Fail or %)	Module Learning Outcome(s) that the assessment task maps to
<i>Live Practical Project:</i> Individual contribution to a response to case study related to trauma - Annotated self-assessment rubric (1500 word equivalent)	100%	T2	%	All

10. Teaching staff associated with the module
