

Module specification

1. Factual information			
Module title	NC7001: Evolving Childhood Perspectives: Focus on Supporting Behaviour, Food and Nutrition, Sleep Hygiene and Home-based Pedagogy and Care		
Module tutor	Viki Bennett Kane/Dr Alex Morfaki	Level	7
Module type	Taught	Credit value	30
Mode of delivery	100% online		
Notional learning hours	300 hours Contact hours (comprising online asynchronous recorded sessions and tasks): 30 hours Face to face (online supervision and tutorials): 2 hours Guided independent study hours (including hours for assessment preparation): 268 hours		

2. Rationale for the module and its links with other modules
<p>Developments in the areas of supporting behaviour, food and nutrition, sleep hygiene and home-based pedagogy and care have contributed to understanding children’s holistic wellbeing and have significant implications for learning and development, policy and practice. However, it is widely accepted that misinformation and conflicting advice in these areas make for a confusing landscape for parents and practitioners. Countering this, advances in neuroscience have enhanced our understanding of brain development and explored the impact of the aforementioned areas on children’s physiological and psychological growth and progress. Concurrently, national and international research has acknowledged the contribution of early childhood experiences in shaping children’s well-being and capacity to learn. and early childhood curricula have emphasised parental partnerships and the active role children have in their learning. Alongside this, global political, economic and ideological movements have reconceptualised childhood and parental roles, and although curricula and policy initiatives aim to promote development and provide guidance, they can serve to perpetuate systemic inequalities and exacerbate disadvantage and confusion. This module will challenge established notions of childhood and examine contemporary issues related to the specialist strands against the background of cultural, historical and political developments and through the lens of multidisciplinary theoretical frameworks.</p>

3. Aims of the module
<p>This module will explore the ethical and practical dilemmas educators and early years practitioners might encounter when supporting babies, children and families. Students will investigate contemporary</p>

3. Aims of the module

topics related to the four specialist strands and explore the position of the child and families within societal and cultural contexts. They will interrogate issues surrounding intersectionality, inequity and disadvantage and consider emancipatory approaches and practices. Students' reflections should consider resolutions and approaches that promote relational pedagogy - a counter discourse focused on the complex web of care and interdependence between individuals and communities.

4. Prerequisite modules or specified entry requirements

N/A

5. Is the module compensatable?

No

6. Learning, teaching and assessment strategy for the module

Online teaching
Study planners
Interactive work
Independent research work
Research-based tasks
Video analysis
Podcast analysis
Analysis of case studies
Reflective diaries
Discussion fora
Tutorials

7. Intended learning outcomes

At the end of the module, learners will be expected to:

1. Critically investigate contemporary national and international issues related to their specialism through systematic engagement with innovative and cutting-edge research.
2. Effectively communicate their synthesised findings to challenge and interrogate complex contemporary issues in early childhood education and care (ECEC).
3. Apply and synthesise theoretical concepts that position the view of the child and the role of families within societal and cultural contexts.
4. Critically reflect on findings to formulate solution-focused approaches that aim to promote children's agency and enhance well-being and development.

A. Knowledge and understanding

B: Cognitive skills

C: Practical and professional skills

D: Key transferable skills

A1

B2, B3

C3

D3

8. Indicative content

Specialist strands: Current developments and challenges: supporting behaviour, food and nutrition, sleep hygiene and home-based pedagogy and care

Conceptualisations of childhood: social, historical and cultural perspectives

Global childhoods: discourses and ideologies

Children and families: voices and representation

Inequality and disadvantage

Neuroscience of child development

8. Indicative content

Established and emerging ECEC theories

Loving and relational pedagogy, pedagogy of listening

9. Assessment**Assessment rationale**

The assignment will be based on a topic selected by the student and focused on one of the specialist strands. They will be expected to collate and present a range of perspectives informed by current national and international research studies and recent developments in the early childhood field. The assessment will be sequential and comprise two critical narrative reflection components:

- Critical Reflection 1: oral. This will interrogate a current topic utilising a systematic overview of research studies.
- Critical Reflection 2: written. This will focus on the application of theoretical frameworks to interrogate preconceived and established notions and propose solutions that empower families, are attuned to children’s perspectives and promote holistic development.

Assessment task	Weighting	Week submitted	Grading (pass/fail/%)	Module learning outcomes the assessment task maps to
Critical Reflection 1 (oral) - 15-minute duration	50%	TBC	%	LO1, LO2
Critical Reflection 2 (written) - 2,500 words	50%	TBC	%	LO3, LO4
